SUBJECT

RFT Funkwerk Koepenick Production of
Medium Wave Broadcasting Transmitters
for Shipment to BulgariaPLACE
ACQUIRED

25X1A

DATE OF
INFO.

25X1X

1. With the exception of four twin transmitters and either one or two half twins under construction at Funkwerk Koepenick ^{1/} no medium wave transmitter with a power exceeding 50 kW is under development or under construction or in production at the plant.
2. VFP Funkanlagen ^{2/} early in April 1953 gave an order to Funkwerk Koepenick for the construction of two medium wave broadcasting transmitters of 100/200 kW for delivery to Bulgaria. Koepenick is to construct these transmitters for a power of 100 kW, but in such a way that output can easily be increased to 200 kW in Bulgaria. This was arranged so that the transmitters can be delivered in the shortest possible time.
3. Funkwerk Koepenick was told that the Bulgarian order has priority over the construction of the medium wave twin transmitters now being built. As a result, the twin transmitters will probably not be finished before the end of 1954. It is practically certain that the transmitters for Bulgaria cannot be completed in 1953.
